

WELDED DUCT & FITTINGS

NFPA-96 Welded Duct Work

Larkin Industries, Inc. manufactures continuously welded grease duct/ fittings from 16 gauge mild steel per NFPA-96 standards. Straight welded duct is available in square or rectangular sizes up to 10 ft. maximum length per section. Duct transitions, pant-leg, elbows, off-set fittings, square-to-round, etc. are available in a variety of custom sizes and types (radius, square, square throat radius heel, etc.). Welded duct work/ fittings have a 3/4 in. welding flange standard. Duct/ fittings may be designed with two flanges (on each end), one flange (raw one end), or no flanges (raw) depending on field application. Fittings can be factory welded to duct work for less field welding. Duct work and fittings are also available in stainless steel for dishwasher applications.
